## Meet the team!

We are uniting top experts in wellness, mental health, and holistic living to nurture a healthy mind, body, and soul.

## Soulfest Founder TJ Higgs

Soulfest evolved from a profound residential program called Trinity, which I and my team ran for five years. The feedback was transformative—our weekends did more than rebuild; they saved lives. Inspired to reach more people, especially given the current state of mental health, I expanded the concept. Soulfest is an all-inclusive, residential weekend where you can fully immerse yourself in an atmosphere of healing, togetherness, and acceptance. This event is designed to celebrate you being authentically you. We've brought together incredible wellness professionals, teachers, authors, and experts to create this life-enhancing experience."

## Workshops & Talks

Workshops and talks begin at 8 AM and continue throughout the day across the village, all included in your weekend. From Breathwork, Sound Baths, and Journaling to Yoga, Salsasize, and much more, immerse yourself in a variety of activities designed to enhance your well-being.
