

Britannia Jinky Jersey Limited Gender Pay Gap Report

INTRODUCTION

As a business, we pride ourselves in our ability to attract, develop, and retain a diverse range of talent across all our parks. We see this as key to our success and a commitment to equal opportunities and equal treatment for all employees, and this is reflected in the figures below.

This report outlines the gender pay gap for Britannia Jinky Jersey Limited. All statistics have been compiled in line with the legislation using the “snapshot date” of 5 April 2017. This reflects the average paid to males and females across our business. It’s not a comparison of pay rates for males and females doing work of equal value.

HOURLY SUMMARY

Figures show the difference in the mean and median pay between males and females.

Mean pay gap 1.2 %

• *Industry standard - Accommodation & Food Sector 11.2% (ONS data - 2017)*

Median pay gap 0.0%

• *Industry standard - Accommodation & Food Sector 5.4% (ONS data - 2017)*

We have an exceptionally low mean gender pay gap of 1.2% and no median gender pay gap which compares very favourably against the Office for National Statistics UK averages of 17.4% and 18.4%, respectively. While this result is significantly better than the national and industry average, we are passionately committed to reduce the gap even further.

BONUS SUMMARY

This demonstrates the differences in mean and median bonus pay between males and females and the proportion of men and women who received bonus pay in the reporting period.

Overall, a higher number of female employees received bonus payments compared to males. Across the company the overall payments made to males and females were on a par.

The mean bonus pay gap arose due to a lower number of females on the parks being in bonus eligible positions, which is in direct contrast to the head office where more females are in bonus eligible positions. The range of bonuses paid to females was greater than those paid to males, creating the median bonus pay gap.

PAY QUANTILES BY GENDER

This illustrates the proportion of pay for male and female employees split within four pay bands.

The proportion of male and female employees per quartile is very consistent at all levels, showing that many opportunities exist at all levels for both female and male employees and that females hold many key senior positions.

STATUTORY DISCLOSURE

This document has been published in accordance with the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017. These results have also been published as required on the Gov.uk website. All data provided is accurate as at 5 April 2017. I confirm that the calculations provided are accurate and meet the requirement of the legislation.
